## SYNOVIUM® MUDCARE

SYNOVIUM® MUDCARE has a unique formula of sufficient sulfur and natural honey for optimum skin care. Sulfur is one of the minerals that the body needs in larger quantities every day. The collagen in the skin is highly dependent on the presence of sufficient sulfur. Sulfur lends itself well to external applications. It provides and supports the repair of skin tissue.

Honey has been used to care for the skin since ancient times. Honey has a low pH value. Bacteria cannot survive in an acid environment. Honey is also caring for the skin due to the presence of natural enzymes. Lanolin keeps the skin flexible and moistureproof.

### CONTAINS

Petrolatum, parafine, lanolin, sulfur, concentrated honey extract.

### USAGE

Make sure skin is free from dirt before applying the cream. Apply the product 2 or 3 times a day to the skin with clean hands. For a better effect apply the cream and wrap with a bandage to keep the skin free from dirt.

### WARNING

Keep out of reach of children.

### STORAGE

Store the ointment in a cool and dry place.

### CONTAINS

500 gr
