

Synovium[®]
HORSE HEALTH

SYNOVIUM[®] AGILITY DOG

Agility promotes joint lubrication and ensures healthy and resilient cartilage. In addition, this supplement strengthens the dog's bones, ligaments and tendons. Agility is very suitable for large dog breeds where the joints require extra attention. The product also supports the joints of older dogs. Give Agility during pregnancy to support the condition of the pregnant bitch and the unborn puppy. Agility is also an excellent addition to growing puppies.

- Good for building cartilage and maintaining flexible joints
- For puppies, working and sport dogs, older dogs and pregnant
- Hypoallergenic and 100% free of additives
- Easy and effective dosing

Agility consists of 100% Bioactive Collagen Peptides (BCP). The collagen peptides in Agility have been specifically developed to support the joints of pets. This makes it possible to dose in a targeted manner and also to be extremely effective. Various studies have shown that Agility administration has a beneficial effect on the joint cartilage of dogs. Stiffness decreased in 70% of the dogs and the ability to move (getting up, climbing stairs) increased significantly. Agility has proven to contribute to the health of the joints, so that the mobility and quality of life of the dog are preserved longer.

USE

Agility is a neutral-tasting powder that is easy to add to the feed. The dosage is based on the body weight of your dog: Weight < 20 kg: 7 grams daily through the drinking water or over the food. Weight > 20 kg: 14 grams daily through the drinking water or over the food. Or as prescribed by your vet. One scoop contains 7 grams. Hypoallergenic, 100% free of additives and sugars.

CONTAINS

Bioactive collagen peptides, neutral in taste and odor.

WARNING

Buiten bereik van kinderen houden.
Close the jar tightly.

STORAGE

Store below 25 ° C.
Do not store in the freezer.

NET QUANTITY

Petpot of 300 grams.
