HORSE HEALTH

## SYNOVIUM<sup>®</sup> HIPPOCHOL

SYNOVIUM HIPPOCHOL is a natural detox for optimal liver and kidney function. Essential for optimal horse health. The liver is an organ that plays an important role in various vital metabolic functions, such as production of bile and the metabolism of carbohydrates, fat and proteins. It is very important that the liver functions optimally in order to use as many nutrients from the feed as possible and also to remove waste products from the body.

Choline is a semi-essential nutrient that is required for the production of lecithin and acetylcholine. When there is a shortage in the body of the essential amino acid methionine, too little choline is produced. During seasonal changes and shedding, it may be useful to administer Hippochol to your horse preventively. Your horses coat can change better and lose its winter hair more easily.

### COMPOSITION

Additives:

Technological additives:

Sorbitol 528000 mg/l

Nutritional additives:

Choline Chloride 150000 mg/l

Methionine 10000 mg/l

### INSTRUCTIONS FOR PROPER USE

Horse and pony: add 1 ½ measuring caps to the feed daily, a 10 day-cure.

Not suitable for foals.

### WARNING

Keep out of the reach and sight of children.

Keep the bottle tightly closed.

### STORAGE

Store dry and below 25°C. Do not freeze.

### QUANTITY

Bottle of 1L

### ANALYTICAL CONSTITUENTS

Crude fibre: <0.3%	Sodium 0.36%
Crude ash: 1.3%	Moisture: 46.8%
Crude protein: 7.6%	
Crude oils and fats: 32.8%
