SYNOVIUM[®] SAND-OIL 369

SYNOVIUM SAND-OIL-369 is a unique formula of various food additives and is scientifically substantiated and is available from many equine doctors. This nutritional supplement for horses contains Psyllium in particular. Psyllium is made from the seeds of the Plantago plant. It is a fiber that can improve intestinal function. The psyllium can attract an enormous amount of moisture and subsequently becomes a gel-like substance.

This substance takes sand and other dirt outside.

SAND-OIL-369 has a swelling volume of 50 ml / g, which is far above the average of 40 ml / g.

Recent research has shown that psyllium in combination with omega oils removes 25% more sand from the intestine than psyllium alone (February 2008, Journal of Animal Physiology and Animal Nutrition). SAND-OIL-369 is used for the removal of sand from the intestines and the promotion of digestion. The Omega 3-6-9 oils also contribute to a better coat and horn quality.

The 1.5 kg pot contains 2 courses and the 4.5 kg no less than 7 courses!

INSTRUCTIONS FOR PROPER USE

Horse and pony: in case of sand in the intestines, a treatment of 21 days is recommended: add 150 grams to the feed daily. 100 grams per day can also be given monthly for 7 days. Foal: in case of sand in the intestines, add 50 grams daily to the feed, cure of 21 days.

Or 2x 25 grams per day for 7 days every month.

Or as prescribed by your vet.

One scoop contains 50 grams.

ANALYTICAL CONSTITUENTS

Crude Protein: 17.0%	Moisture: 6.99%
Crude fibre: 5.5%	Crude ash: 26.7%
	Crude Oil: 9.49%

COMPOSITION

Feed materials:
Psyllium Husk 400 g/kg
Extruded Full Fat Soy 300 g/kg
Additives:
Zootechnical additives (per kg):
Beta-glucan 400 mg
Technological additives:
Kaolin 270 mg
Lignosulphonate 25 mg
Propionic Acid 5 mg

WARNING

Keep out of the reach and sight of children.

Keep the bottle tightly closed.

STORAGE

Store below 25°C.

Do not store in the freezer

QUANTITY: 1.5 kg or 4.5 kg
